

NATIONAL OCCUPATIONAL STANDARD FOR A SCUBA DIVER

**NOS.SD.01
FIRST EDITION**

APPROVING AUTHORITY

This National Occupational Standard has been prepared and published under the authority of the Zambia Qualifications Authority Board on 19th May 2022.

ZAMBIA QUALIFICATIONS AUTHORITY

The Zambia Qualifications Authority Act No. 13 of 2011 was enacted by the Government of the Republic of Zambia to ***“provide for the development and implementation of a national qualifications framework; establish the Zambia Qualifications Authority; provide measures to ensure that standards and registered qualifications are internationally comparable; and provide for matters connected with, or incidental to the foregoing”***. Among other functions, ZAQA is responsible for ***determining national standards for any occupation***, through various sector specific National Occupational Standards Development Teams (NOSDTs).

REVISION OF NATIONAL OCCUPATIONAL STANDARDS

National Occupational Standards shall be revised after every **5 years**, or whenever necessary, by the issue of either amendments or of revised editions. It is important that users of National Occupational Standards (NOS) ascertain that they are in possession of the latest amendments or editions.

NOS DEVELOPMENT TEAM RESPONSIBLE

This National Occupational Standard was prepared by the Agriculture National Occupational Standards Development Team, upon which the following organisations were represented:

1. Agricultural Institution of Zambia (AIZ)
2. Aquaculture Development Association of Zambia
3. CropLife Zambia
4. Ministry of Fisheries and Livestock (Department of Fisheries)
5. Golden Valley Agricultural Research Trust (GART)
6. Katete College of Agricultural Marketing
7. Ministry of Agriculture (Department of Agriculture)
8. Mulungushi University (MU)
9. Natural Resources Development College (NRDC)
10. University of Zambia (UNZA)
11. Veterinary Council of Zambia
12. Zambia Agriculture Research Institute (ZARI)
13. Zambia National Farmers Union (ZNFU)
14. Zambia Seed Trade Association (ZASTA)
15. Zambia Qualifications Authority (ZAQA)

ACKNOWLEDGEMENT

The Zambia Qualifications Authority would like to acknowledge the invaluable support of the following stakeholders that participated in the development of this National Occupational Standard:

1. Dr. Amy Kingdom (Zambia National Farmers Union - ZNFU)
2. Dr. Batiseba Tembo (Zambia Agriculture Research Institute - ZARI)
3. Dr. Elias Kantashula (University of Zambia - UNZA)
4. Dr. Joself M. Chileshe (University of Zambia - UNZA)
5. Maj. Nelson kaluba (Rtd) (Aquaculture Development Association of Zambia)
6. Mr. Alex Dennis Chilala (Zambia Agriculture Research Institute – ZARI)
7. Mr. Davis Mwanza (Natural Resources Development College - NRDC)
8. Mr. Enerst Muzukutwa (CropLife Zambia/ZASTA)
9. Mr. Johnstone Mfula (Ministry of Fisheries and Livestock (Department of Fisheries)
10. Mr. Malumo Nawa (Ministry of Agriculture (Department of Agriculture)
11. Mr. Masautso E. Sakala (Natural Resources Development College - NRDC)
12. Mr. Mathews Ngosa (Agricultural Institution of Zambia (AIZ))
13. Mr. Shadreck C. Mubanga (Golden Valley Agricultural Research Trust - GART)
14. Mr. Stanford Phiri (Katete College of Agricultural Marketing)
15. Mr. T. Mwale (Mulungushi University)
16. Mrs. Precious Hamusute (Veterinary Council of Zambia)
17. Ms. Eva N. Kaonga (University of Zambia - UNZA)
18. Ms. Sylvia H. N'gandu (University of Zambia - UNZA)
19. Mr. Fidelis Cheelo (Zambia Qualifications Authority)
20. Miss Womba Soneka (Zambia Qualifications Authority)
21. Mr. Modest Hamalabbi (Zambia Qualifications Authority)

FOREWORD

The Zambia Qualifications Authority (ZAQA) is a statutory body under the Ministry of Education established by ZAQA Act No. 13 of 2011 to ***“provide for the development and implementation of a national qualifications framework; provide measures to ensure that standards and registered qualifications are internationally comparable; and provide for matters connected with, or incidental to the foregoing”***.

Among other functions, ZAQA is responsible for ***“determining national standards for any occupation”***, through various sector specific National Occupational Standards Development Teams (NOSDTs) of experts composed of representation from appropriate authorities, government departments, industry, academia, regulators, consumer associations and non-governmental Organisations, etc.

This National Occupational Standard (NOS) has been developed by the Agriculture National Occupational Standards Development Team in accordance with the procedures and guidelines of ZAQA. All users should ensure that they have the latest edition of this publication as National Occupational Standards are revised from time to time.

This NOS shall be used by, among others, industry, employers, quality assurance bodies, awarding and professional bodies and education and training institutions, as a benchmark to identify training needs, develop job profiles/descriptions, develop curricula and learning programmes, in various sectors where the occupation exists. In the Agriculture sector, demonstration of competence against this NOS may be required in order to run a business or practice a craft or profession.

JUSTIFICATION

Operations in Fisheries and Aquaculture and other sectors include a series of underwater tasks. Hence a SCUBA Diver is required in order to undertake these underwater duties including site selection for cage location, monitoring net integrity, under water fishing, conducting searches, routine inspections using an underwater compass, depth indicators, and associated underwater equipment. They perform adjustments and maintenance on SCUBA and underwater accessories.

This National Occupation Standard provides the core knowledge, skills, competences and personal attributes that a SCUBA Diver must possess in order for them to successfully execute their work duties.

ACRONYMS AND ABBREVIATIONS

CS	Core Skill
NOS	National Occupational Standard
NOSDT	National Occupational Standards Development Team
OK	Organisational Knowledge
PC	Performance Criteria
PS	Professional Skill
RK	Regulatory Knowledge
RPL	Recognition of Prior Learning
SCUBA	Self-Contained Underwater Breathing Apparatus
SD	SCUBA Diver
TK	Technical Knowledge
ZAQA	Zambia Qualifications Authority
ZQF	Zambia Qualifications Framework
CPR	Cardiopulmonary Resuscitation

GLOSSARY OF TERMS

For the purposes of this NOS, the following terms and definitions shall apply:

Core Skills/Generic Skills: are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the NOS, these include communication related skills that are applicable to most job roles.

Function: is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of NOS.

Job Title: defines a unique set of functions that together form a unique employment opportunity in an organisation.

Knowledge and Understanding: are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

National Occupational Standards (NOS): are statements of the standards of performance individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding. They are precise descriptions of what an individual is expected to be able to do in his/her work role.

National Occupational Standards (NOS) Code: is a unique reference code that identifies a NOS.

National Occupational Standards Development Team (NOSDT): means an established group of national stakeholders/experts responsible for the development of National Occupational Standards within a specific economic sector or occupation.

Occupation: is a set of job roles, which perform similar/related set of functions in an industry.

Organisational Context: includes the way the organisation is structured and how it operates, including the extent of operative knowledge that managers have in their relevant areas of responsibility.

Performance Criteria: are statements that together specify the standard of performance required when carrying out a task.

Scope: is the set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on the quality of performance required.

Sector: is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.

Sub Sector: is derived from a further breakdown based on the characteristics and interests of its components.

Technical Knowledge: is the specific knowledge needed to accomplish specific designated responsibilities.

Unit Title: gives a clear overall statement about what the incumbent should be able to do.

1. OVERVIEW

This is the NOS for a SCUBA Diver who performs a series of underwater tasks for long periods. The table below provides a summary of the job description, purpose and overall requirements that a SCUBA diver must possess in order for them to successfully execute their day to day duties.

NOS Code	NOS. SD.01
Occupation	Scuba Diver
Job Title	Scuba Diver
Job Description	The role of a SCUBA Diver is to perform commercial diving activities and underwater operations in inshore waters. The spectrum of SCUBA diving includes industrial tasks (Inspecting nets and enclosures, locate or recover submerged automobiles, boats, logs, articles, search for bodies and administer first aid and CPR in case of emergencies) performed from just below the water to 30m depth.
Job Purpose	To operate safely and competently under water to depths of 30m using self-contained and surface-supplied breathing apparatus. Apply basic skills in order to complete a range of underwater tasks safely and efficiently and be able to administer first aid and CPR.
ZQF Level	4
Sector	Agriculture
Sub sector	Fisheries and Aquaculture
Other Economic Sector(s) in which the Occupation is Practiced	Tourism, Education, Mining, Construction Research and Development
Other Similar Jobs that can be performed by a Scuba Diver	Offshore divers, Inshore divers, HAZMAT divers, Diving photographers, Scientific divers, Police divers, Military divers etc.
Minimum Educational Job Entry Qualification(s)	Certificate in scuba diving
Practicing License Requirements (if any)	Medical fitness certificate by registered medical practitioner qualified in underwater medicine
Training/RPL	Swimming
Minimum Job Entry Age	18 years
Prior Experience	• Technical training • Field experience • Demonstrated proficiency
Performance Criteria	As described in the Units under Section 4

2. SCOPE

This National Occupational Standard specifies the fundamental knowledge and understanding, skills and competences that a SCUBA Diver must possess to be successful in his/her job role. It is applicable to SCUBA Divers working in public or private organisations or self-employed.

3. PERSONAL ATTRIBUTES (VALUES, ETHICS AND ATTITUDES)

The job of a SCUBA divers requires an individual to be:

- Be calm
- Disciplined
- Physically fit
- Good swimmer
- Flexible to manage a demanding work schedule.

4. UNITS AND ELEMENTS

This National Occupational Standard is divided into 3 Units representing the tasks that a job holder should undertake in his/her day to day work. Each unit is further broken down into elements depicting the number of activities to be carried out for the successful execution of a particular task.

UNIT 1: [This unit is about understanding equipment and other accessories used in scuba diving.]

Unit No.	01
Unit Title	Understanding equipment and other accessories
Description	This unit is about appropriate knowledge about the physical characteristics, operating principles, maintenance, and use of specific diving equipment.
Scope	This unit covers the following: • Use of tools, equipment, devices, and systems • Knowledge and experience in decompression and chamber operations • Routine maintenance of equipment, devices and other accessories.
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Use of tools, equipment, devices, and systems	To be competent, the individual must be able to: PC1. Identify various equipment specific to scuba diving operations PC2. Proficiently use tools, equipment, devices, and systems associated with diving PC3. Charge diving set using high-pressure air charging compressor
Knowledge and experience in decompression and chamber operations	To be competent, the individual must be able to: PC4. Undertake chamber operations when working with decompression chambers.
Routine maintenance of equipment, devices and other accessories	To be competent, the individual must be able to: PC5. Implement routine maintenance procedures and checks on the following devices/equipment - Scuba mask - Snorkel - Dive fins - Buoyancy compensation device (BCD) - Scuba regulator - Octopus setup - Compass - Pressure - Depth gauges - Dive weights - Rashguard - Dive skin - Wetsuit PC6. Carry out replacement and refill procedures where required
Knowledge and Understanding (K)	

A. Organisational Context (Knowledge of the company/organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: OK1. Organisation's procedures followed during routine maintenance and checks OK2. Organisation's rules and regulations to be followed according to diving standards
B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of: TK1. Servicing/repairs and routine maintenance of diving equipment and accessories TK2. Determining safe working loads of cordage, connectors, and any indigenous joints or connections
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate knowledge and understanding of: RK1. Regulatory requirements for diving & safety
Skills (S)	
A. Core Skills/ Generic Skills	Writing Skills
	The individual on the job must be able to: CS1. Write in English and give simple concise instructions.
	Reading Skills
	The individual on the job must be able to: CS2. Read and understand all documents and manuals of equipment manufacturers and apply them. CS3. Read and understand manuals, health and safety instructions, memos, and other company documents. CS4. Read from different sources- books, screens in machines and signage. CS5. Interpret various colour codes, nomenclature, and acronyms related to the profession.
	Oral Communication (Listening and Speaking skills)
B. Professional Skills	The individual on the job must be able to: CS6. Express statements or information clearly so that others can hear and understand. CS7. Participate in and understand the main points of simple discussions. CS8. Respond appropriately to any queries.
	Decision Making
	The individual on the job must be able to: PS1. Take decisions with systematic course of actions and/or response. PS2. Assist in taking decisions on the kind of environmental conditions taking into account the lake conditions and depth of diving PS3. Follow Organisation rule-based decision-making process.
	Plan and Organise

	The individual on the job must be able to: PS4. Plan and organize putting together of various parts of the diving equipment. PS5. Work constructively and collaboratively with others.
	Customer Centricity
	The individual on the job must be able to: PS6. Follow the code of conduct. PS7. Manage relationships with customers with intent on satisfying its requirements for service delivery. .
	Problem Solving and Decision Making
	The individual on the job must be able to: PS8. Troubleshoot the feedback after diving sessions and subsequent dives. PS9. Solve problems related to practical usage of diving equipment PS10. Approach relevant authority when required. PS11. Judiciously use common sense in day to day activities
	Analytical Thinking
	The individual on the job must be able to: PS12. Apply domain information from the original equipment manufacturers to diving equipment
	Critical Thinking
	The individual on the job must be able to: PS13. Critically evaluate information obtained from customers, supervisor and co-workers to perform day to day activities. PS14. Use common sense and make judgments on day to day basis PS15. Use reasoning skills to identify and resolve basic problems PS16. Utilise logical questions for better understanding.

UNIT 2 [This unit is about the preparation procedures for diving in self-contained underwater breathing apparatus.]

Unit No.	02
Unit Title	Preparation for diving in self-contained underwater breathing apparatus
Description	This unit is about the preparation for diving in self-contained underwater breathing apparatus.
Scope	This unit covers the following: Preparation for diving
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Preparation for diving.	To be competent, the individual must be able to: PC1. Prepare the work plan for diving PC2. Crisscross readiness of decompression tables/dive computer for undertaking normal decompression in dives

	up to 30 meters PC3. Prepare diving accessories/equipment for SCUBA diving PC4. Prepare vessels for water transport such as outboard motor and inflatable craft, and underwater communications PC5. Charge diving set using high-pressure air charging compressor
Knowledge and Understanding (K)	
A. Organisational Context (Knowledge of the organisation and its processes)	To be competent, the individual on the job must demonstrate knowledge and understanding of: OK1. Organisation's procedures followed routine diving preparation
B. Technical Knowledge	To be competent, the individual on the job must demonstrate knowledge and understanding of: TK1. Safety regulations and record-keeping TK2. Charts and navigation with respect to diving TK3. Safety of equipment carried onboard TK4. Testing and checking on standards of diving equipment and purity of air TK5. Tables for decompression and surface decompression for SCUBA dive TK6. Design, functioning and basic repair and maintenance schedules of SCUBA diving equipment
C. Regulatory context (Knowledge of Rules and Regulations)	To be competent, the individual on the job must demonstrate knowledge and understanding of: RK1. Regulatory requirements for SCUBA Diving
Skills (S)	
A. Core Skills/ Generic Skills	Writing Skills
	The individual on the job must be able to: CS1. Write in English and give simple concise instructions.
	Reading Skills
	The individual on the job must be able to: CS2. Read and understand all documents and manuals of equipment manufacturers and apply them. CS3. Read and understand manuals, health and safety instructions, memos, other company documents. CS4. Read from different sources- books, screens in machines and signage. CS5. Interpret colour codes, nomenclature and acronyms related to the profession.
Oral Communication (Listening and Speaking skills)	

	The individual on the job must be able to: CS6. Express statements or information clearly so that others can hear and understand. CS7. Participate in and understand the main points of simple discussions. CS8. Respond appropriately to any queries.
B. Professional Skills	Decision Making
	The individual on the job must be able to: PS1. Follow Organisation's rule-based decision-making process. PS2. Take decisions with a systematic course of action and/or response. PS3. Assist in making decisions on the kind of environmental conditions taking into account the lake conditions and depth of diving
	Plan and Organise
	The individual on the job must be able to: PS4. Plan and organize various parts of the diving equipment. PS5. Work constructively and collaboratively with others.
	Customer Centricity
	The individual on the job must be able to: PS6. Follow the code of conduct. PS7. Manage relationships with customers to satisfy the requirements for service delivery.
	Problem Solving and Decision Making
	The individual on the job must be able to: PS8. Troubleshoot the feedback after diving sessions and subsequent dives. PS9. Solve problems related to practical usage of diving equipment PS10. Approach relevant authority when required. PS11. Judiciously use common sense in day to day activities.
	Analytical Thinking
	The individual on the job must be able to: PS12. Apply domain information from the original equipment manufacturers on diving equipment
	Critical Thinking
	The individual on the job must be able to: PS13. Critically evaluate information obtained from customers, Supervisor and co-workers to perform day to day activities. PS14. Apply common sense and make judgments on day to day basis PS15. Use reasoning skills to identify and resolve basic problems PS16. Use logical questions for better understanding.

UNIT 3 [This unit is about diving procedures and techniques, emergency procedures, Physiology and physics as they relate to diving and the administration of First aid and CPR.]

Unit No.	03
Unit Title	Carrying out diving procedures, techniques and emergency procedures
Description	This unit is about understanding the diving procedures and techniques, emergency procedures, Physiology and physics as they relate to diving and the administration of First aid and CPR
Scope	This unit covers the following: • Diving procedures and techniques. • Emergency procedures. • Performing underwater operations • Physiology and physics as they relate to diving. • First aid and CPR.
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Diving procedures and techniques.	To be competent, the individual must be able to: PC1. Dive from different deployment platforms such as stage, Scaffold stage, Small boat, Dive basket etc. PC2. Swim as per the following: 300 meters in 10 minutes; Underwater for 25 meters; 01-Minute floating with hands in air; 50 meters with 5% body mass on weight belt; 20 seconds underwater breath hold PC3. Carry out minimum 18 dives to a depth of 30 meters with a total bottom time during dives of 700 minutes at 0-19 meters and 100 minutes at 20-30 meters. PC4. Effectively employ operational use of lightweight diving equipment, procedures and safety consideration. PC5. Execute diving procedures and techniques; such as proper way of entering the water, using hose signals and other means of communication. PC6. Use of procedural manuals. - Safety precautions - Orientation dives using diving gear. - Proper tending procedures - Proper use of communications - Time keeping/chart procedures - Use of diver's log book
Emergency procedures.	To be competent, the individual must be able to: PC7. Carry out diving drills using SCUBA PC8. Perform self-rescue in an emergency situation PC9. Use diving signals, communication systems on surface and underwater effectively during emergency PC10. Follow and implement emergency procedures that may affect the health and safety of personnel - Loss of breathing media - Loss of communications - Fouled or entrapped diver - Injured diver in water

	e) Severance of diver's umbilical - gas hose only f) Severance of complete umbilical g) Fire h) Equipment failure - diver in the water i) Adverse environmental conditions j) Oxygen toxicity in water k) Oxygen toxicity during treatment l) Emergency evacuation
Performing underwater operations	To be competent, the individual must be able to: PC11. Carry out simple underwater surveys and searches PC12. Carry out the underwater task (inspection, installation and repair of underwater equipment and structure, fishing, net repairs, etc) safely and efficiently using self-contained oxygen enriched nitrox diving equipment.
Physiology and physics as they relate to diving.	To be competent, the individual must be able to: PC13. Apply diving physics formulas. a) Gauge and absolute pressure at various depths b) Volume of cylinders c) Time duration of air supply from air flasks d) Air supplies required by divers e) Flow requirements for masks and hats f) Required capacity of air compressor g) Hose test formula h) Application of physics formulas PC14. Carry out decompression using various methods. PC15. Demonstrate experience in the practical application of decompression tables. a) History of decompression b) Decompression d) Surface decompression tables (O₂ and Air) e) Practical application of decompression tables in theoretical dives f) Altitude diving tables and computation
First Aid and CPR.	To be competent, the individual must be able to: PC16. Administer First Aid treatment such as Cardio Pulmonary Resuscitation (CPR) to a diver suffering from diving related physiological conditions, gas and contamination related diving illnesses PC17. Meet or exceed the minimum standards as set forth by the Zambian Red Cross or equivalent in dealing with; a) Shock b) Artificial respiration (CPR) c) Use of mechanical resuscitation d) Hemorrhage (bleeding) e) Fracture f) Burns g) Wounds h) Communication with medical personnel (terminology)

	i) Assist in treatment of diving-related illness and accidents j) Cardiac arrest
Knowledge and Understanding (K)	
A. Organisational Context (Knowledge of the company/organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: - OK1. Organisation's procedures followed routine maintenance and checks - OK2. Organisation's rules and regulations to be followed according to diving standards
B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of - TK1. Anatomy and physiology of the circulatory and respiratory systems of the human body in order to understand the effects of pressure and changes of pressure on the human body. - TK2. The process and what happens when ambient pressure is increased or decreased. - TK3. Functioning of inflatable craft, outboard motors and underwater communication equipment - TK4. Safety regulations in relation to charging of diving sets - TK5. Basic design, functioning and basic maintenance schedules of recompression chambers and functioning of underwater inspection equipment - TK6. Underwater hazards - TK7. First Aid measures appropriate to common diving and industrial accidents/ illnesses.
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate knowledge and understanding of: - RK1. Regulatory requirements for water transport and diving - RK2. Regulatory requirements for first aid and CPR administration
Skills (S)	
A. Core Skills/ Generic Skills	Writing Skills The individual on the job must be able to: - CS1. Write in English and give simple concise instructions. Reading Skills The individual on the job must be able to: - CS2. Read and understand all documents and manuals of equipment manufacturers and apply them. - CS3. Read and understand manuals, health and safety instructions, memos, other company documents. - CS4. Read from different sources- books, screens in machines and signage. - CS5. Interpret colour codes, nomenclature and acronyms related to the profession.

B. Professional Skills	Oral Communication (Listening and Speaking skills)
	The individual on the job must be able to: CS6. Express statements or information clearly so that others can hear and understand. CS7. Participate in and understand the main points of simple discussions. CS8. Respond appropriately to any queries.
	Decision Making
	The individual on the job must be able to: PS1. Follow Organisation's rule-based decision-making process. PS2. Take decisions with a systematic course of action and/or response. PS3. Assist in taking decisions on the kind of environmental conditions taking into account the lake conditions and depth of diving
	Plan and Organise
	To be competent, the individual on the job must be able to: PS4. Plan and organize putting together of various parts of the diving equipment. PS5. Work constructively and collaboratively with others.
	Customer Centricity
	To be competent, the individual on the job must be able to: PS6. Follow the code of conduct. PS7. Manage relationships with customers with the intent of satisfying their requirements for service delivery. .
	Problem Solving and Decision Making
	The individual on the job must be able to: PS8. Troubleshoot the feedback after diving sessions and subsequent dives. PS9. Solve problems related to practical usage of diving equipment PS10. Approach relevant authority when required. PS11. Judiciously use common sense in day to day activities
	Analytical Thinking
	The individual on the job must be able to: PS12. Apply domain information from the original equipment manufacturers to diving equipment
	Critical Thinking
	The individual on the job must be able to: PS13. Critically evaluate information obtained from customers, supervisors and co-workers to perform day to day activities. PS14. Use common sense and make judgments on day to day basis PS15. Use reasoning skills to identify and resolve basic problems PS16. Ask relevant questions for better understanding.

5. EQUIPMENT, TOOLS AND CONSUMABLE MATERIALS

These include, but not limited to; A knife, diving wristwatch and depth gauge. Full face masks with water communication devices. A weight belt with a quick release. A buoyancy compensator device (BCD), cylinders, a cylinder harness with a quick release. An emergency O₂ administration kit.

6. DILEMMAS/CHALLENGES AND COMPLEXITIES FOR A JOB HOLDER

Dilemmas associated with the job of a SCUBA Diver include long working hours, decompression sickness (DCS, the “bends”), arterial air embolism, and of course drowning, working in extreme weather such as cold-water conditions, working in wet environment, etc.

6.1 Alternative Choices (Solutions) to Dilemmas and Complexities

Solutions to dilemmas include carrying out risk assessment, ensuring careful training and preparation for diving, time management, participating in workplace safety sensitization and awareness, supporting capacity building through training, managing work stress, adhering to company’s safety and standard operating procedures at all times, paying attention to detail, consulting extensively within and outside one’s department/team on safety and other issues.

7. WORKING CONDITIONS/ENVIRONMENT

Working conditions include the following:

- Often wear wet suits, air tanks, and other diving attire.
- Often work underwater, rarely work indoors.
- Are often exposed to loud and distracting sounds and noise levels.
- Must monitor the length and depths of their dives to avoid getting “the bends.”
- Are occasionally exposed to whole body vibration.
- Sometimes work in very cold water.
- Are sometimes exposed to hazardous situations that may produce cuts or burns.
- Occasionally work in cramped conditions in small boats.
- Are sometimes exposed to hazardous equipment.
- Sometimes work in dim light while under water. They may work in bright light when welding.
- Sometimes work in hazardous conditions.
- May work at sites in remote locations

8. PARTIES INVOLVED/INTERACTING WITH THE JOB HOLDER OR TRAINEE

8.1 Internal/Within the Organisation

Parties involved/interacting with the job holder who are internal to the Organisation include supervisors, subordinates, and other employees.

8.2 External/Outside the Organisation

Parties involved/interacting with the job holder who are external include customers/clients, government regulators, trainers, suppliers of equipment/tools/consumables, occupational health and safety associations, Academia etc.

9. PHYSICAL DEMANDS ON THE BODY

- Physique to sustain strenuous conditions;
- Be able to walk and stand for long periods of time;
- Bend, stretch, twist, or reach out;
- Be able to lift relatively heavy materials, tools and equipment;
- Be able to use fingers, hands and feet with ease to complete the assigned task (dexterity);
- Etc.

ANNEX A

Criteria for Assessments based on this NOS

A.1 Guidelines for Assessment

- A.1.1** Criteria for assessment for curricula and learning programmes based on this NOS will be created by curricula and programmes developers. Each Performance Criteria (PC) will be assigned marks proportional to its importance in the NOS. Curricula and programmes developers will also lay down proportion of marks for theory and practical skills for each performance criteria, giving more weight to practical skills.

There shall be allocated the 'Total Mark', which will be the sum of all marks in each Unit, distributed across the number of PCs in that particular Unit. The 'out of' mark will be the mark allocated to each PC, which will be shared between theory and skills practical assessments.

- A.1.2** Awarding/assessment bodies or institutions and other users of the NOS will create unique question papers for the theory part and evaluations for skill practical part for their respective candidates.

ANNEX B NOS Version Control

This Annex gives details necessary for the tracking of the NOS versions based on the number of revisions.
