

NATIONAL OCCUPATIONAL STANDARD FOR A LIVESTOCK SLAUGHTER SUPERVISOR

**NOS.LSS.01
FIRST EDITION**

APPROVING AUTHORITY

This National Occupational Standard has been prepared and published under the authority of the Zambia Qualifications Authority Board on 19th May 2022.

ZAMBIA QUALIFICATIONS AUTHORITY

The Zambia Qualifications Authority Act No. 13 of 2011 was enacted by the Government of the Republic of Zambia to ***“provide for the development and implementation of a national qualifications framework; establish the Zambia Qualifications Authority; provide measures to ensure that standards and registered qualifications are internationally comparable; and provide for matters connected with, or incidental to the foregoing”***. Among other functions, ZAQA is responsible for ***determining national standards for any occupation***, through various sector specific National Occupational Standards Development Teams (NOSDTs).

REVISION OF NATIONAL OCCUPATIONAL STANDARDS

National Occupational Standards shall be revised after every five (5) years, or whenever necessary, by the issue of either amendments or of revised editions. It is important that users of National Occupational Standards (NOS) ascertain that they are in possession of the latest amendments or editions.

NOS DEVELOPMENT TEAM RESPONSIBLE

This National Occupational Standard was prepared by the Agriculture National Occupational Standards Development Team, upon which the following organisations were represented:

1. Agricultural Institution of Zambia (AIZ)
2. Aquaculture Development Association of Zambia
3. CropLife Zambia
4. Ministry of Fisheries and Livestock (Department of Fisheries)
5. Golden Valley Agricultural Research Trust (GART)
6. Katete College of Agricultural Marketing
7. Ministry of Agriculture (Department of Agriculture)
8. Mulungushi University (MU)
9. Natural Resources Development College (NRDC)
10. University of Zambia (UNZA)
11. Veterinary Council of Zambia
12. Zambia Agriculture Research Institute (ZARI)
13. Zambia National Farmers Union (ZNFU)
14. Zambia Seed Trade Association (ZASTA)
15. Zambia Qualifications Authority (ZAQA)

ACKNOWLEDGEMENT

The Zambia Qualifications Authority would like to acknowledge the invaluable support of the following stakeholders that participated in the development of this National Occupational Standard:

1. Dr. Amy Kingdom (Zambia National Farmers Union - ZNFU)
2. Dr. Batiseba Tembo (Zambia Agriculture Research Institute - ZARI)
3. Dr. Elias Kantashula (University of Zambia - UNZA)
4. Dr. Joself M. Chileshe (University of Zambia - UNZA)
5. Maj. Nelson kaluba (Rtd) (Aquaculture Development Association of Zambia)
6. Mr. Alex Dennis Chilala (Zambia Agriculture Research Institute – ZARI)
7. Mr. Davis Mwanza (Natural Resources Development College - NRDC)
8. Mr. Enerst Muzukutwa (CropLife Zambia/ZASTA)
9. Mr. Johnstone Mfula (Ministry of Fisheries and Livestock (Department of Fisheries)
10. Mr. Malumo Nawa (Ministry of Agriculture (Department of Agriculture)
11. Mr. Masautso E. Sakala (Natural Resources Development College - NRDC)
12. Mr. Mathews Ngosa (Agricultural Institution of Zambia (AIZ))
13. Mr. Shadreck C. Mubanga (Golden Valley Agricultural Research Trust - GART)
14. Mr. Stanford Phiri (Katete College of Agricultural Marketing)
15. Mr. Joseph T. Mwale (Mulungushi University)
16. Mrs. Precious Hamusute (Veterinary Council of Zambia)
17. Ms. Eva N. Kaonga (University of Zambia - UNZA)
18. Ms. Sylvia H. N'gandu (University of Zambia - UNZA)
19. Mr. Fidelis Cheelo (Zambia Qualifications Authority)
20. Miss Womba Soneka (Zambia Qualifications Authority)
21. Mr. Modest Hamalabbi (Zambia Qualifications Authority)

FOREWORD

The Zambia Qualifications Authority (ZAQA) is a statutory body under the Ministry of Education established by ZAQA Act No. 13 of 2011 to “**provide for the development and implementation of a national qualifications framework; provide measures to ensure that standards and registered qualifications are internationally comparable; and provide for matters connected with, or incidental to the foregoing**”.

Among other functions, ZAQA is responsible for “**determining national standards for any occupation**”, through various sector specific National Occupational Standards Development Teams (NOSDTs) of experts composed of representation from appropriate authorities, government departments, industry, academia, regulators, consumer associations and non-governmental organisation, etc.

This National Occupational Standard (NOS) has been developed by the Agriculture National Occupational Standards Development Team in accordance with the procedures and guidelines of ZAQA. All users should ensure that they have the latest edition of this publication as National Occupational Standards are revised from time to time.

This NOS shall be used by, among others, industry, employers, quality assurance bodies, awarding and professional bodies and education and training institutions, as a benchmark to identify training needs, develop job profiles/descriptions, develop curricula and learning programmes, in various sectors where the occupation exists.

JUSTIFICATION

The Livestock Slaughter Supervisor is responsible for supervising the process of taking a live animal, and processing them safely and hygienically to produce clean meat quarters, as well as clean offal, ready for further processing in a butchery environment.

This occupation is necessary in order to ensure that meat is produced in a safe and hygienic manner with due regard for animal welfare, and public safety. Animals slaughtered by untrained personnel pose a risk to human public health, so it is important to have trained individuals to carry out this task.

ACRONYMS AND ABBREVIATIONS

CS	Core Skill
LSS	Livestock Slaughter Supervisor
NOS	National Occupational Standard
NOSDT	National Occupational Standards Development Team
OK	Organizational Knowledge
PC	Performance Criteria
PS	Professional Skill
RK	Regulatory Knowledge
RPL	Recognition of Prior Learning
TK	Technical Knowledge
VCZ	Veterinary Council of Zambia
ZABS	Zambia Bureau of Standards
ZAQA	Zambia Qualifications Authority
ZEMA	Zambia Environmental Management Agency
ZQF	Zambia Qualifications Framework

GLOSSARY OF TERMS

For the purposes of this NOS, the following terms and definitions shall apply:

Core Skills/Generic Skills: are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the NOS, these include communication related skills that are applicable to most job roles.

Function: is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of NOS.

Job Title: defines a unique set of functions that together form a unique employment opportunity in an organisation.

Knowledge and Understanding: are statements, which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

National Occupational Standards (NOS): are statements of the standards of performance individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding. They are precise descriptions of what an individual is expected to be able to do in his/her work role.

National Occupational Standards (NOS) Code: is a unique reference code that identifies a NOS.

National Occupational Standards Development Team (NOSDT): means an established group of national stakeholders/experts responsible for the development of National Occupational Standards within a specific economic sector or occupation.

Occupation: is a set of job roles, which perform similar/related set of functions in an industry.

Organisational Context: includes the way the organisation is structured and how it operates, including the extent of operative knowledge that managers have in their relevant areas of responsibility.

Performance Criteria: are statements that together specify the standard of performance required when carrying out a task.

Scope: is the set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on the quality of performance required.

Sector: is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.

Sub Sector: is derived from a further breakdown based on the characteristics and interests of its components.

Technical Knowledge: is the specific knowledge needed to accomplish specific designated responsibilities.

Unit Title: gives a clear overall statement about what the incumbent should be able to do.

1. OVERVIEW

This section gives an overview of the occupation of a Livestock Slaughter Supervisor, the purpose of the job, as well as the educational requirements.

NOS Code	NOS. LSS.01
Occupation	Livestock Slaughterer Supervisor
Job Title	Livestock Slaughter Supervisor
Job Description	Ensure that animals and carcasses are managed safely and hygienically before, and throughout the slaughter process.
Job Purpose	To oversee (1) the care of the animal prior to slaughter, (2) the restraint, stunning and bleeding of the animal, (3) the hygienic removal of the head, feet hides and internal organs and cleaning of them, and (4) the splitting of the clean, inspected carcasses and loading into the cold-room or into trucks.
ZQF Level	3
Sector	Agriculture
Sub sector	Livestock (meat production)
Other Economic Sector(s) in which the Occupation is Practiced	Wildlife Slaughter, Game Meat Production
Other Similar Jobs that can be performed by a Livestock Slaughter Supervisor.	Blockman. <i>(with extra training, this individual may also specialize as a butchery worker, or meat processor, which is the next stage of the meat production process).</i>
Minimum Educational Job Entry Qualification(s)	Level 3 Certificate
Practicing License Requirements (if any)	Veterinary Council of Zambia.
Training/RPL	None
Minimum Job Entry Age	18 Years
Prior Experience	Prior experience with livestock is recommended.
Performance Criteria	As described in the Units under Section 4

2. SCOPE

This National Occupational Standard specifies the fundamental knowledge and understanding, skills and competencies that a Livestock Slaughter Supervisor must possess to be successful in his/her job role.

He/She must have basic skills to handle live cattle, as well as theoretical and hands-on training in the slaughter process, up to the point of producing matured carcass quarters.

This occupational standard applies to any person working as a supervisor in the slaughter industry. It also includes supervisors who are involved in slaughter of a wide range of livestock including cattle, sheep, goats, pigs, poultry, and wildlife, as similar principles apply across all species.

3. PERSONAL ATTRIBUTES (VALUES, ETHICS AND ATTITUDES)

This job requires an individual to possess

- Problem-solving skills
- Interpersonal skills
- Integrity and Honesty
- Hygiene Awareness
- Knowledge of animal welfare principles, and the effect of poor welfare on meat quality.
- Commercial Awareness
- Ability to lead and supervise
- Attention to detail, and ability to adhere to set standards in food safety production
- Ability to use a computer and produce basic reports and schedules
- Ability to communicate effectively and clearly
- Self-motivated and team worker
- Ability to plan and prioritize,
- Quality and time consciousness
- Occupational health and safety oriented

4. UNITS AND ELEMENTS

This National Occupational Standard is divided into six (06) Units representing the tasks that a job holder should undertake in his/her day-to-day work. Each unit is further broken down into elements depicting the number of activities to be carried out for the successful execution of a particular task.

UNIT 1 [This unit is about health, safety, hygiene, and the environment].

Unit No.	01
Unit Title	Safety, health, hygiene, and environmental management
Description	This unit is about maintaining safety, health, hygiene, and environmental protection for the individual and the abattoir.
Scope	This unit covers the following: • Health & safety regulations. • Environmental protection. • Hygiene Standards
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Health & safety regulations	To be competent, the individual must be able to: PC1. Read, understand and implement organizational safety and health policies and regulations. PC2. Understand risks and possible safety hazards of all aspects of operations.
Environmental protection.	To be competent, the individual must be able to: PC3. Implement the environmental policies for the organisation. PC4. Implement standard operating procedures and policies of the organisation.
Hygiene Standards	To be competent, the individual must be able to: PC5. Adhere to personal hygiene standards PC6. Implement hygiene standards across the whole abattoir, according to Standard Operating Procedures.
Knowledge and Understanding (K)	
A. Organisational Context (Knowledge of the company/ organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: OK1. Company Quality, health, and safety policies OK2. Company standard operating procedures OK3. Company regulations and best practices
B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of: TK1. The principles of personal hygiene. TK2. The different types of disinfectants and where they are used (food-safe, non-food safe, and human contact). TK3. Cleaning all types of equipment according to industry standards.
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate knowledge and understanding of : RK1. Requirements for health & safety RK2. Requirements for environmental protection, and waste disposal.

	RK3. Requirements for hygiene for staff, equipment and infrastructure, including requirements for medical health certification of personnel.
Skills (S)	
A. Core Skills/ Generic Skills	Writing Skills
	The individual on the job must be able to : CS1. Write reports, and keep records.
	Reading Skills
	The individual on the job must be able to: CS2. Read and implement Standard Operating Procedures and follow regulations.
	Oral Communication (Listening and Speaking skills)
	The individual on the job must be able to : CS3. Express statements or information clearly, so that others can hear and understand. CS4. Participate in and understand the main points of discussions. CS5. Respond appropriately to any queries.
B. Professional Skills	Decision Making
	The individual on the job must be able to: PS1. Follow the organisation rules and policies. PS2. Make limited decisions within the framework of the procedures and policies.
	Plan and Organise
	The individual on the job must be able to: PS3. Plan and organise in order to be at work on time, and in order to keep tasks and productions lines operating effectively. PS4. Work constructively and collaboratively with others, and encourage a teamwork mentality.
	Common Sense
	The individual on the job must be able to: PS5. Approach relevant supervisor, for advice, when required. PS6. Judiciously use common sense in day-to-day activities
	Critical Thinking
	The individual on the job must be able to: PS7. Critically evaluate information obtained from trainers, supervisors, and co-workers to perform day-to-day activities. PS8. Ask relevant questions for better understanding.

UNIT 2 [This unit is about handling of the live animal before slaughter].

Unit No.	02
Unit Title	Handling of the live animal before slaughter.
Description	This unit is about handling and managing the live animal, before slaughter, in such a way that minimises stress and cruelty, in order to produce a high-quality meat product.
Scope	This unit covers the following: • Live Animal Handling
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Live Animal Handling	To be competent, the individual must be able to: PC1.Ensure the animals are safely offloaded from transportation. PC2. Ensure the animals are kept in a quiet, clean, stress-free area, until time for slaughter. PC3. Ensure that the animal is calmly and quietly positioned in the restraints ready for stunning/captive bolt
Knowledge and Understanding (K)	
A. Organisational Context (Knowledge of the company/ organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: OK1. Company Quality, health, and safety policies for the handling of live animals. OK2.Company standard operating policies for the handling of live animals. OK3.Company regulations and best practices for the handling of live animals.
B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of: TK1. Handling procedures for the type of livestock (cattle, pigs, sheep, goat, or poultry). TK2. Operation of handling and restraint facilities. TK3. Handling animals in a cruelty-free and stress-free manner.
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate knowledge and understanding of: RK1. Requirements for health & safety RK2. Requirements for food safety and public health. RK3. Requirements for animal welfare.

UNIT 3 [This unit is about the stages of the slaughter process].

Unit No.	03
Unit Title	The Slaughter Process
Description	This unit covers the slaughter processes, which include stunning, bleeding, skinning, and flaying.
Scope	This unit covers the following: • Stunning (or shooting) of the animals • Slaughter Process. • Bleeding out of the carcass • Skinning the carcass • Flaying the carcass
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Stunning (or shooting) of the animals	To be competent, the individual must be able to: PC1.Ensure that the animal is stunned or shot in such a way, as to render it immediately unconscious.
The Slaughter Process.	To be competent, the individual must be able to: PC2.Ensure the animal is hung as soon as possible after stunning, so as to ensure a proper bleed-out.
Bleeding out of the carcass	To be competent, the individual must be able to: PC3. Ensure that bleed-out is initiated within the recommended timeframe for the species
Skinning the carcass	To be competent, the individual must be able to: PC4. Ensure that the skinning process is carried out with an understanding of keeping the “dirty outer skin” out of contact with the “inner clean meat.” PC5. Ensure that the head, legs, and skin are removed from the slaughter area as quickly and cleanly as possible, and allow them to be further processed in the “dirty” zone of the abattoir.
Flaying the carcass	To be competent, the individual must be able to: PC6. Ensure that the flaying process is carried out with an understanding that the intestinal contents should be kept separated from the clean meat products, and that contamination should be prevented, or at least minimised.
Knowledge and Understanding (K)	
A. Organisational Context (Knowledge of the company/ organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: OK1. Company Quality, health and safety policies with regard to the slaughter process. OK2.Company standard operating policies for slaughter OK3.Company regulations and best practices for slaughter.

B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of: TK1. Safely operating a stun gun/captive bolt, and the safety procedures around the usage of this piece of equipment. TK2. Operating the block and tackle, in order to safely hang the carcass. TK3. Cutting the throat of the animal, timeously and in such a way as to achieve an effective bleed-out. TK4. Skinning the animal in such a way that the skin does not contaminate the meat (and in the case of pigs, how to flame the carcass, and in the case of poultry, how to de-feather). TK5. Flaying the animal in such a way that the intestinal content does not contaminate the meat.
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate knowledge and understanding of: RK1. Requirements for health & safety Rk2. Requirements for food safety and public health.
Skills (S) – The same skills are required for all the listed units below	
A. Core Skills/ Generic Skills	Writing Skills
	The individual on the job must be able to : CS1. Write reports, and keep records.
	Reading Skills
	The individual on the job must be able to: CS2. Read and implement Standard Operating Procedures and follow regulations.
	Oral Communication (Listening and Speaking skills)
	The individual on the job must be able to : CS3. Express statements or information clearly, so that others can hear and understand. CS4. Participate in and understand the main points of discussions. CS5. Respond appropriately to any queries.
B. Professional Skills	Decision Making
	The individual on the job must be able to: PS1. Follow the organisation's rules and policies. PS2. Make limited decisions within the framework of the procedures and policies.
	Plan and Organise
	The individual on the job must be able to: PS3. Plan and organise in order to be at work on time, and in order to keep tasks and productions lines operating effectively. PS4. Work constructively and collaboratively with others, and encourage a teamwork mentality.
	Common Sense
	The individual on the job must be able to: PS5. Approach relevant supervisor, for advice, when required. PS6. Judiciously use common sense in day-to-day activities

	Critical Thinking
	The individual on the job must be able to: PS7. Critically evaluate information obtained from trainers, supervisor and co-workers to perform day-to-day activities. PS8. Ask relevant questions for better understanding.

UNIT 4 [This unit is about separating dirty and clean zones in an abattoir, as well as dirty and clean processes.].

Unit No.	04
Unit Title	Managing and Separating the clean and dirty processes in an abattoir
Description	This unit is about understanding the difference between the clean and dirty processes in the abattoir, and how to manage them.
Scope	This unit covers the following: • Identification of the clean products • Identification of the dirty products. • Order or processing, and contamination prevention procedures
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Identification of the Clean Products	To be competent, the individual must be able to: PC1. List and identify the clean sections of a carcass, which should be kept protected from all forms of contamination.
Identification of Dirty Products	To be competent, the individual must be able to: PC2. List and identify the dirty outer parts of a carcass, and know how these should be removed from the carcass as well as the area. PC3. List and identify the dirty inner parts of the carcass, and know how these should be removed from the carcass, as well as the area.
Order or processing, and contamination prevention procedures	To be competent, the individual must be able to: PC4. Conduct clean and dirty processes in order. PC5. Maintain physical separation between clean and dirty products, through the usage of physical space, different personnel, changes of clothing, and usage of closed-lid containers for the storage of potentially contaminated offals.
Knowledge and Understanding (K)	
A. Organisational Context (Knowledge of the company/ organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: - OK1. Company Quality, health and safety policies with respect to biosecurity and hygiene. - OK2. Company standard operating policies - OK3. Company regulations and best practices

B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of: TK1. Skinning the animal using the clean hand/dirty hand concept. TK2. Skinning the animal using the clean knife/dirty knife concept. TK3 “ring the bung” and flay the animal without any intestinal content contamination. TK4. Handling of the carcass, before moving onto processing of offals, and measures to take in between the two processes, when working alone.
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate knowledge and understanding of: RK1. Requirements for health & safety RK2. Requirements for food safety and public health

UNIT 5 [This unit is about handling the clean carcass in a way that is food safe.].

Unit No.	05
Unit Title	Cutting, Handling and Maturation of the clean carcass.
Description	This unit is about handling of the clean carcass/meat, and keeping it safe in terms of food safety.
Scope	This unit covers the following: - Ensuring that Meat inspection is carried out - Cutting of the carcass into quarters and moving into the cold-room facility - Maturation of quarters for the required timeframe - Loading of Quarters into transport or transfer to meat processing.
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Ensuring that Meat inspection is carried out.	To be competent, the individual must be able to: PC1.Ensure that meat inspection is carried out before the carcass is allowed to be released from the facility for human consumption.
Cutting of the carcass into quarters and moving into the cold-room facility	To be competent, the individual must be able to: PC2. Cut the carcass into quarters. PC3. Hygienically move the carcass into the cold room, with due regard to food safety protocols.
Maturation of quarters for the required timeframe	To be competent, the individual must be able to: PC4. Mature the animal in the cold-room facility for the required amount of time for that species. PC5. Ensure that there is a numbering and tracking system so as to know how long each carcass has matured before it is despatched for further processing.

Loading of Quarters into transport or transfer to meat processing	To be competent, the individual must be able to: PC6. Load the carcass, safely and hygienically, onto transport or transfer them to the meat processing facility. PC7. Operate any required equipment for the movement of carcasses.
Knowledge and Understanding (K)	
A. Organisational Context (Knowledge of the company/ organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: OK1. Company Quality, health, and safety policies for the handling of hanging carcasses. OK2. Company standard operating policies for the handling of carcasses. OK3. Company regulations and best practices for the handling of carcasses.
B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of: TK1. Hygienically cutting the carcass into quarters. TK2. Labeling or tracking carcasses in the cold room, to ensure that the recommended maturation time is followed. TK3. Moving the quarters into the cold room or into trucks, in a manner that complies with food safety norms.
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate knowledge and understanding of: RK1. Requirements for health & safety RK2. The requirements for food safety and meat inspection.

UNIT 5 [This unit is about supervision of staff.].

Unit No.	06
Unit Title	Supervision of Staff
Description	This unit is about the element required for the supervision of staff.
Scope	This unit covers the following: • Management of the workflow and encouraging of teamwork. • Training of new staff, and evaluating of staff performances • Reporting to management (and Human Resources where relevant) • Helping to resolve employee issues and disputes (especially in small organisations without a Human Resources department).
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria (PC)
Management of workflow, work schedules, and encouraging teamwork	To be competent, the individual must be able to: PC1. Ensure that all staff know what tasks they are supposed to do. PC2. Create and manage schedules showing the work tasks, and which staff will complete them. PC3. Ensure that each task flows into the others. PC4. Encourage staff to work as a team.
Training of new hires, and evaluating of staff performance	To be competent, the individual must be able to: PC5. Train new workers in the unit or production line. PC6. Evaluate the performance of staff at regular intervals and in accordance with the organisations HR policies.
Reporting to management (and Human Resources where relevant)	To be competent, the individual must be able to: PC7. Write reports on staffing issues for management or the HR department.
Helping to resolve employee issues and disputes (especially in small organisations without a Human Resources department)	To be competent, the individual must be able to: PC8. Evaluate employee dispute, and determine the best course of action. PC9. Resolve disputes where possible, and refer unresolvable issues to higher management.
Knowledge and Understanding (K)	

A. Organisational Context (Knowledge of the company/organisation and its processes)	The individual on the job must demonstrate knowledge and understanding of: - OK1. Company quality, health and safety policies - OK2. Company standard operating policies for handling of employee matters. - OK3. Company regulations and best practices for employee supervision. - OK4. Employee Job Descriptions and contractual obligations.
B. Technical Knowledge	The individual on the job must demonstrate knowledge and understanding of: TK1. How to operate a computer to write reports and draw up schedules, and notices.
C. Regulatory context (Knowledge of Rules and Regulations)	The individual on the job must demonstrate basic knowledge and understanding of: - RK1. Requirements for employment, the Employment Code Act, and Industrial Relations Act. - RK2. Occupational Health and Safety Act. - RK3. Other Acts related to employment including Workmen's compensation Act, and NAPSA Act.

5. EQUIPMENT, TOOLS AND CONSUMABLE MATERIALS

The equipment needed includes: computer, printer, livestock handling facilities with good restraint, lockable cupboard/guncase for storage of humane killer/captive bolt, stainless steel buckets (for disinfection of knives), stun gun/humane killer/captive bolt, block and tackle with chain, large colour-coded containers for storage of different sections of the carcass. The tools required include: sharp stainless steel knives with colour-coding for different tasks, hacksaw or automatic saw, hot water system and PPE (plastic apron, overalls, gumboots, goggles, safety hat, food safety caps). The consumables required include: bullets for the humane killer, food-safe disinfectant, normal disinfectant, handwashing soap, gloves (optional), edible Ink for stamping.

6. DILEMMAS/CHALLENGES AND COMPLEXITIES FOR A JOB HOLDER

Dilemmas associated with the job of an Slaughter Supervisor include exposure to chemical (eg disinfectants), physical (eg harm from live animals, or falling carcasses, as well as from sharp instruments, and moving production lines) and biological (eg zoonotic diseases) hazards, time pressure to complete tasks (especially in a production line), working in extreme weather such as hot and cold conditions, working in noisy, wet and dirty environments, psychological impact and mental health.

6.1 Alternative Choices (Solutions) to Dilemmas and Complexities

Solutions to dilemmas include carrying out risk assessment and implementing appropriate control measures to manage the physical, chemical and biological risks, ensuring facilities are in good working order with good ventilation, ensuring equipment is in good order before each shift begins, good management of order of slaughter, so that risky animals are slaughtered last, and with extra PPE precautions, ensuring good time management and planning, participating in workplace safety sensitization and awareness, supporting capacity building through training, managing work stress, adhering to company's safety and standard operating procedures at all times, paying attention to detail, consulting extensively within and outside one's department/team on safety and other issues, consulting with specialists for mental health support where needed, and taking regular breaks throughout the day.

7. WORKING CONDITIONS/ENVIRONMENT

Working conditions include working in cold, hot and wet conditions, working at heights, working in slippery conditions, standing/walking for long hours, climbing of steps, bending, twisting and lifting of heavy objects, working in out-of-hour shifts, areas that are noisy and dirty, areas with limited lighting and ventilation. Working in confined spaces, with exposure to blood and intestinal bacteria.

8. PARTIES INVOLVED/INTERACTING WITH THE JOB HOLDER OR TRAINEE

8.1 Internal/Within the Organization

Parties involved/interacting with the job holder who are internal to the organization include meat inspectors, transporters, supervisors, subordinates, and other employees.

8.2 External/Outside the Organization

Parties involved/interacting with the job holder who are external include transporters, government regulators, trainers, suppliers of equipment/tools/consumables, occupational health and safety committee, and trade unions.

9. PHYSICAL DEMANDS ON THE BODY

- Physique to sustain strenuous conditions;
- Be able to walk and stand for long periods of time;
- Be able to climb up and down steps;
- Bend, stretch, twist, or reach out;
- Be able to lift relatively heavy materials, tools and equipment;
- Be able to use fingers, hands and feet with ease to complete the assigned task (dexterity);
- Able to quickly and efficiently identify and separate clean from dirty portions of the carcass;
- Mentally healthy to deal with the process of slaughter on a daily basis

ANNEX A

Criteria for Assessments based on this NOS

A.1 Guidelines for Assessment

A.1.1 Criteria for assessment for curricula and learning programmes based on this NOS will be created by curricula and programmes developers. Each Performance Criteria (PC) will be assigned marks proportional to its importance in the NOS. Curricula and programmes developers will also lay down proportion of marks for theory and practical skills for each performance criteria, giving more weight to practical skills.

There shall be allocated the 'Total Mark', which will be the sum of all marks in each Unit, distributed across the number of PCs in that particular Unit. The 'out of' mark will be the mark allocated to the skills practical assessments.

A.1.2 Awarding/assessment bodies or institutions and other users of the NOS will create unique evaluations for skill practical part for their respective candidates.

ANNEX B

NOS Version Control

This Annex gives details necessary for the tracking of the NOS versions based on the number of revisions.
